DESIGN STUDIO

More than design We create a **vision**

THE STUDIO

Design is not decoration, It is emotion made visible.

We design intelligent spaces shaped by identity, emotion, and purpose. Every commission begins with a clear reading of context and client, how a space should work, feel, and age.

Interior architecture, material strategy, and spatial psychology are treated as one discipline: circulation that guides instinctively, light that sets rhythm, textures that carry meaning. What you see is considered. What you don't see is engineered.

We prioritize durable materials, honest detailing, and systems that perform so the architecture remains coherent long after the first impression. Proportion leads our decisions. Form is reduced until only what serves function and atmosphere remains.

Our work is defined by balanced geometry, meaningful simplicity, and technical accuracy, spaces that are precise in plan, calm in section, and generous in use.

We don't decorate. We define.

Working at the intersection of art, architecture, and craftsmanship, lohan blends refined aesthetics with technical precision, from concept sketches and 3D photorealistic renders to architectural plans and custom furniture fabrication, his style merges elegance and innovation.

With a background as a visual artist and painter, lohan’s creative journey began with form, color, and emotion, the essence of artistic expression. Over time, his vision evolved toward the architectural scale, where he studied and specialized in architecture and spatial design, bridging artistic intuition with structural discipline.

The studio was born from a simple truth, that every line drawn carries responsibility. What started as an individual search for balance between art and structure became a collective pursuit of integrity in design. Over time, we learned that beauty lasts only when logic and emotion coexist.
Our story is not about growth in size, but in depth, in how we think, create, and build.

Design is not born from inspiration but from observation, discipline, and refinement.

TAILORED DESIGN SERVICES

Design is not decoration, It is emotion made visible.

We design and deliver residences and boutique hospitality with clear scope and a single quality standard.

- Strategy & Concept: site review, space planning, functional zoning, moodboards, material palette.
- Technical Design: dimensioned plans, sections and construction details, lighting & switching layouts, MEP coordination.
- Visualization: photorealistic renderings and short walkthroughs to validate decisions early.
- Bespoke Furniture (design → build → install) product design, technical drawings and installation details, prototyping & sample approvals, production with vetted workshops (in house via VOGOFI FURNITURE) specialist installation on site (leveling, alignment, tolerances) and care guides.
- Specifications & Cost Plan: finishes, fixtures, lighting, hardware, product sheets and quantities.
- Procurement & Production: supplier shortlist, quotes, sample approvals, purchase orders, logistics.
- Fit-out & Installation: finishes, millwork, furniture, lighting, supervised install, snagging, clean handover.
- Aftercare: fine tuning and maintenance guidance post handover.

We don’t guess. We engineer design.

Design without method is guesswork. Execution without strategy is risk. The process we have is our operational system, a disciplined process that unites analysis, architecture, functionality, and aesthetics under one clear direction. Every project begins with real data, behavioral logic, and measurable objectives. No assumptions. No improvisation.
We work with precision. We define, structure, design and execute with purpose. Nothing enters a project unless it has functional relevance and long term value. The process is not just a workflow, it is our standard of truth in design.
Result: spaces with logic, identity and presence.

WHAT WE DELIVER

Design is not decoration, it is emotion made visible.

Interior Design

Complete residential interior design, from spatial planning and material selection to photorealistic 3D visualization of every room.

INCLUDES

Concept | 2D Floor Plans | 3D Renders | Technical Drawings | Material Specs

Custom Furniture

Made to measure furniture designed for your space, kitchens, wardrobes, storage systems, living room units, bathroom vanities.

INCLUDES

Design | Renders | Technical Plans | Production | Installation

Turnkey Projects

End to end project management, we coordinate all suppliers, craftsmen and contractors so you receive a fully finished space.

INCLUDES

Full Coordination | Supplier Mgmt | On site Supervision | Quality Control

Commercial Spaces

Office design, showrooms, retail spaces and commercial interiors, functional layouts that reflect your brand identity.

INCLUDES

Space Planning | Brand Integration | Furniture Sourcing | Fit- out

Architecture

Complete architectural design, from initial concept and volumetric studies to full construction documentation and permit ready drawings.

INCLUDES

Concept | 3D Modeling | Permit Drawings | Construction Docs | 3D Visualization

We define client identity and design direction through behavioral analysis, lifestyle mapping and our Design DNA system.

HOW WE WORK

Design is not decoration, it is emotion made visible.

01.

Brief & Assessment

We meet to understand your space, lifestyle, needs and budget. A detailed brief is created to guide every decision.

Project brief, space assessment, budget framework.

02.

Concept Development

We develop the design direction, mood boards, spatial layouts, material palettes and a clear vision for your space.

Mood boards, layout options, material palette.

03.

Visualization & Documentation

Photorealistic 3D renders and complete technical drawings bring the concept to life before any work begins on site.

3D renders, technical plans, furniture specs.

04.

Production & Coordination

Custom furniture enters production. We coordinate all suppliers and prepare the execution timeline.

Furniture production, supplier coordination.

05.

Execution & Handover

On site supervision, quality control, installation of all elements. You receive a fully finished, move in ready space.

Supervision, quality control, final styling.

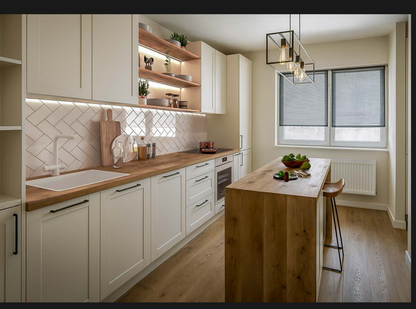
RESIDENTIAL DESIGN

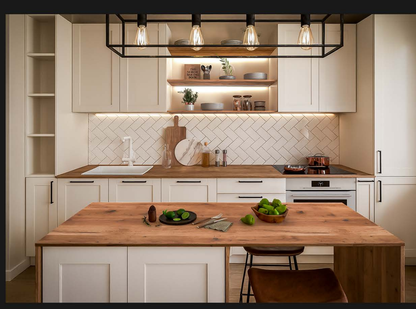
Where geometry meets the soul

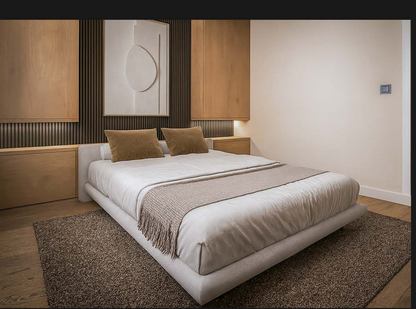
Homes that embrace, beauty, light and function. Every space is designed to perform beautifully and last.

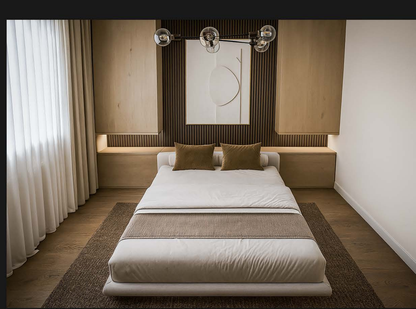
COMPACT MODERN STUDIO

A thoughtfully designed 60 sqm apartment maximizing space through smart layouts, warm materials, and integrated storage solutions.





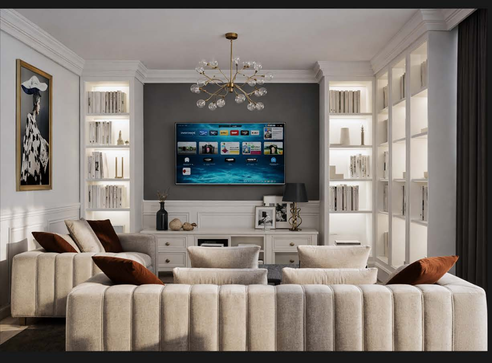


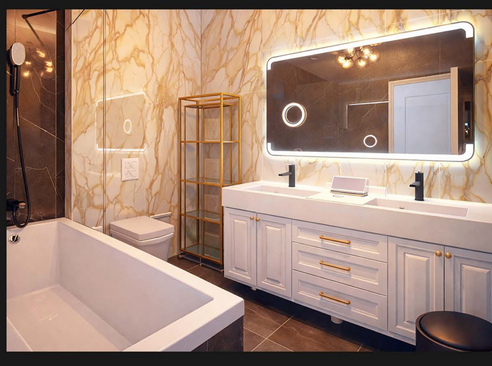


A warm, contemporary apartment defined by natural wood tones, soft neutrals, and textured layering. The design balances intimacy with openness, slatted wood panels frame the living area, creating rhythm and depth without closing the space. Earthy materials meet refined details: fluted surfaces, ambient backlighting, and carefully curated furniture create an atmosphere that feels collected, not decorated. The kitchen blends functionality with warmth through light cabinetry and natural wood countertops, while the bedroom maintains the same tonal calm, a cohesive space designed for comfort that ages well

MODERN CLASSIC APARTMENT

A thoughtfully designed 120 sqm apartment, a space that feels inherited, not assembled.

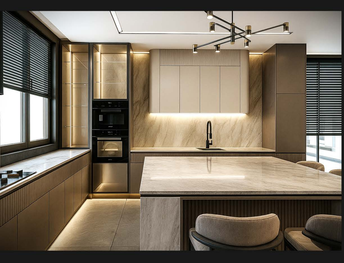


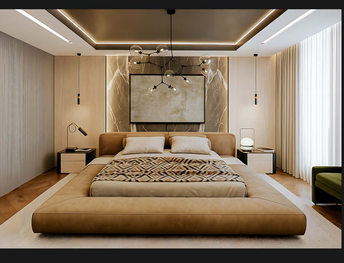


A refined modern classic interior, crisp whites, soft greys, and deep navy accents. Neoclassical proportions meet contemporary restraint: paneled cabinetry, symmetrical libraries with integrated lighting, and brass details that add warmth without excess. The kitchen anchors the home with white shaker profiles against dark blue marble. Every element is considered and balanced, a space that feels inherited, not assembled.

CONTEMPORARY LUXURY PENTHOUSE

A sophisticated 400 sqm penthouse designed for modern living

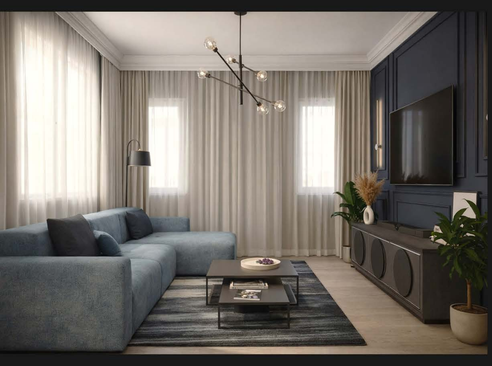


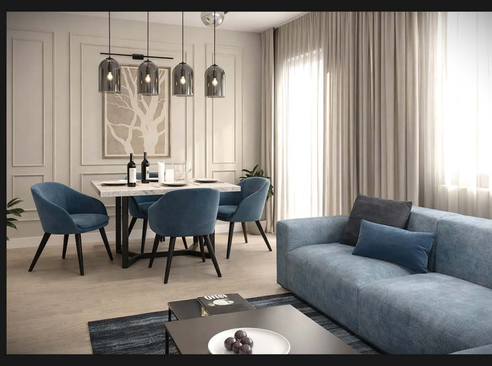


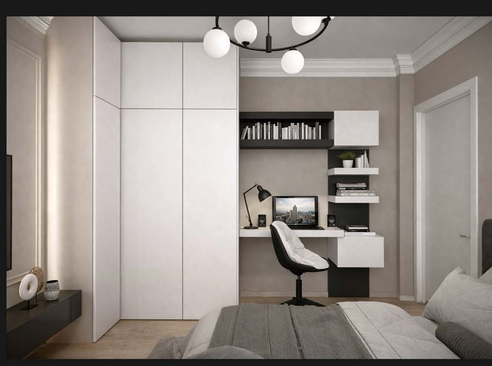
A bold contemporary penthouse where luxury meets cinematic character. The design is built on warm neutrals, olive greens, and brushed copper, anchored by a sweeping curved sofa beneath a dramatic black and white statement wall. Vertical fluted panels, sculptural lighting, and layered ceiling details create depth across every room. The space flows between entertainment, dining, and retreat, a pool table, open kitchen with marble islands, and bedrooms wrapped in ambient linear lighting. Confident, expressive, and unapologetically generous, a residence designed to perform at scale.

NAVY TRANSITIONAL RESIDENCE

Where heritage meets modern restraint.



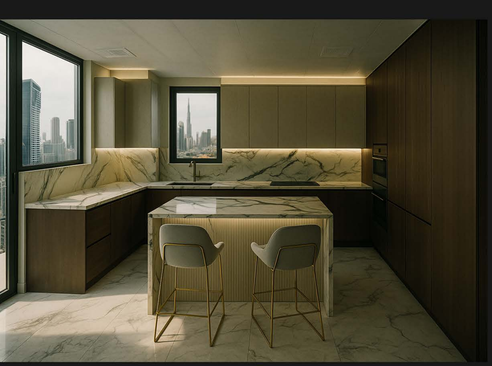


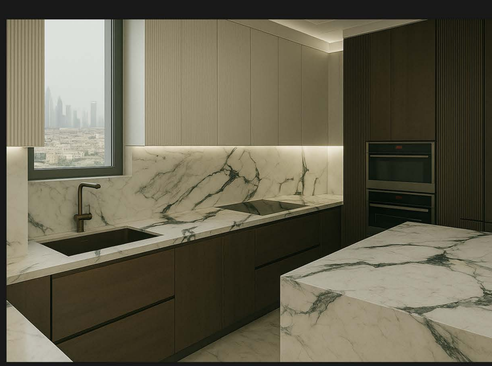


A sophisticated transitional interior anchored by deep navy and soft ivory. Classic wall paneling meets contemporary furniture blue velvet seating, smoked glass pendants, and a marble dining surface create a dialogue between heritage and modernity. The palette is deliberate: dark accent walls frame light filled rooms, giving each zone its own weight while maintaining a cohesive tonal rhythm. Restrained, elegant, and quietly confident, a home that balances character with calm.

STONE & BRONZE RESIDENCE

Stone, light, and restrained elegance.





A refined contemporary luxury interior defined by warm stone, muted earth tones, and dark bronze accents. Marble feature walls anchor the living spaces while cream modular seating and sculptural furniture, like the olive lounge chair, add softness and form. The material palette is rich but controlled: bookmatched stone, warm timber veneers, and layered ambient lighting create depth without visual noise. Every room carries the same tonal discipline, bedroom, kitchen, living, a seamless atmosphere of understated opulence. Quiet luxury, precisely executed.

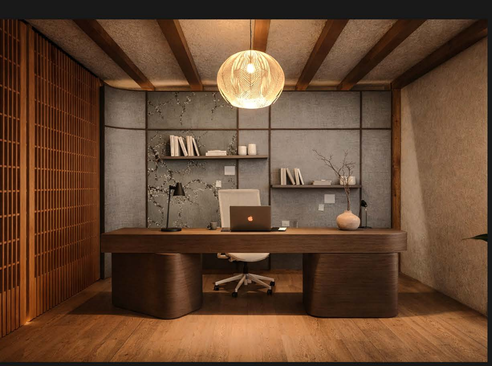
COMMERCIAL DESIGN

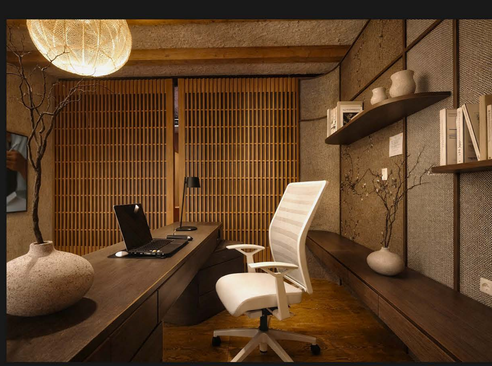
Functional layouts that communicate brand identity, offices, showrooms, clinics and retail spaces.

Spaces that work as hard as your brand.

JAPANDI STYLE AESTHETIC CLINIC

Blending Japanese minimalism with Scandinavian warmth

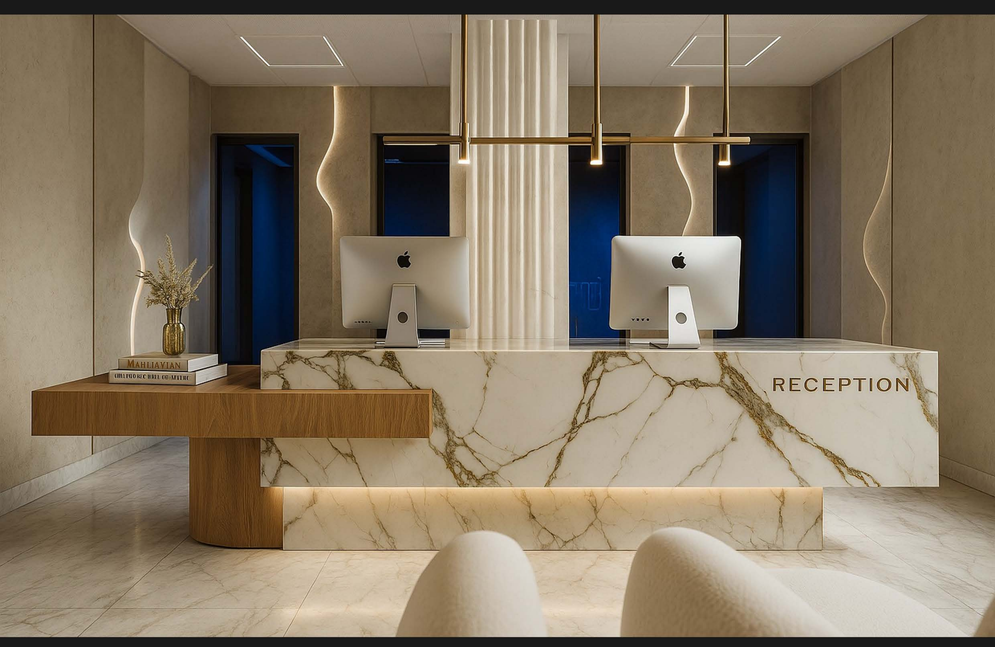




A Japandi inspired commercial interior where Japanese spatial philosophy meets Scandinavian warmth. Natural oak, raw plaster, and woven textures create an atmosphere of meditative calm, arched openings, circular motifs, and exposed timber beams give the space a grounded, almost temple like quality. The reception and lounge areas flow seamlessly, softened by warm pendant lighting and low profile seating. A space designed not just to welcome, but to slow you down.

MEDICAL CLINIC DESIGN

Where healthcare meets hospitality.



A modern luxury medical clinic designed to elevate the patient experience from the first step. White marble surfaces, warm oak accents, and gold branding create a hospitality grade reception that feels more boutique hotel than healthcare. The design shifts confidently between zones, a plush waiting lounge, a statement conference room with black and gold detailing, and clinical areas softened by sculptural wall elements and ambient ceiling lighting. Teal accents in the consultation rooms add personality without compromising professionalism. Premium, polished, and brand forward healthcare designed to inspire trust through design.

ARCHITECTURAL DESIGN

Structure that shapes the landscape.

From concept through construction documentation, residential and commercial architecture with precision engineering.

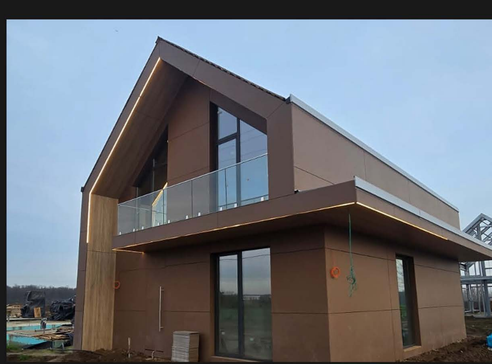
BRAȘOV RESIDENTIAL COMPLEX

Modern living, mountain scale.

A contemporary residential complex set against the Carpathian backdrop. Clean volumetric composition, flat roofs, generous balconies, and a restrained palette of charcoal, warm grey, and white create a modern silhouette that sits confidently in the landscape. The massing breaks into staggered blocks, avoiding monotony while maintaining architectural coherence. Ground level commercial spaces, structured landscaping, and clear pedestrian flow give the development an urban quality rooted in livability. Designed to age with the neighborhood, not against it.

METAL FRAME HOUSES

Steel precision, natural expression.



Contemporary metal frame residences where sharp gabled geometry meets warm natural cladding. A precision engineered steel structure delivers strength and speed, wrapped in timber finishes and dark metal panels that give the architecture its warmth and character. Floor to ceiling glazing opens each volume to the landscape. The project spans from concept through construction, the steel skeleton visible in progress photos proves the engineering behind the aesthetic. Clean lines, honest materials, and a form that feels both modern and deeply rooted.

A-FRAME RETREATS

Geometry in the wild.

A bold reinterpretation of the classic A frame, stripped to its purest geometric form. Dark metal cladding and full height glazing transform a primal shape into a modern retreat. Each cabin sits lightly on a timber deck, framing the forest rather than interrupting it. The steel skeleton is visible in construction, revealing the precision behind the simplicity. Compact, sculptural, and designed to disappear into the landscape while commanding attention. Architecture reduced to its essence, a triangle, a view, and nothing more.

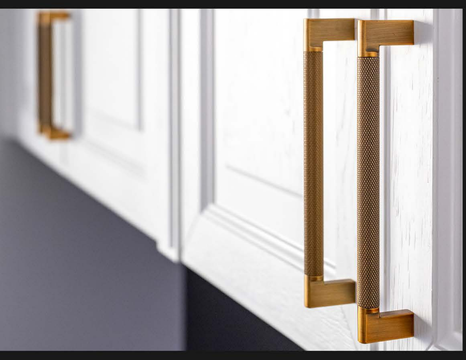
DESIGNED & PRODUCED

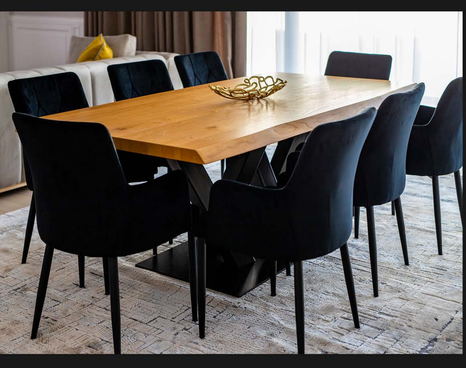
Bespoke furniture, precision built for every detail of your space.

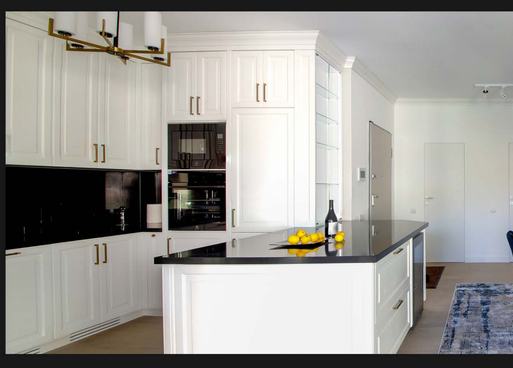
Every piece engineered for your space, built to fit, built to last.

CLASSIC WHITE KITCHEN

Crafted details, flawless finish.



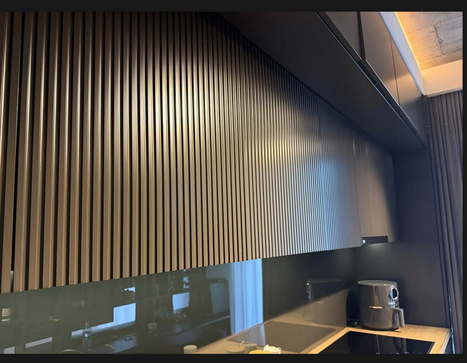


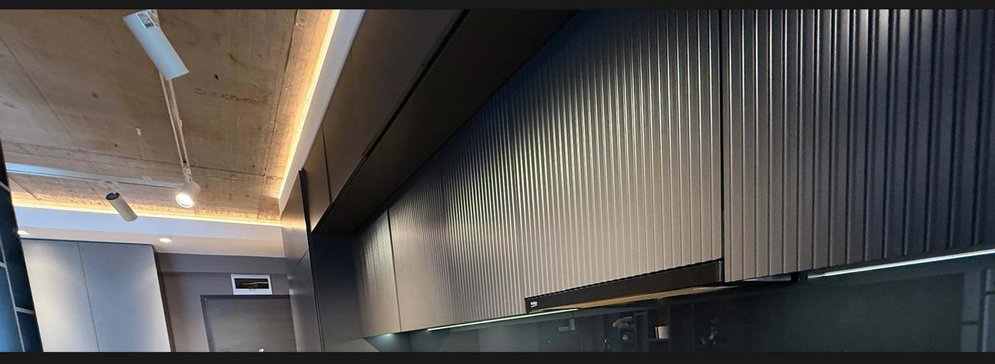


A bespoke kitchen built on contrast, white paneled cabinetry with brass hardware set against deep black stone countertops. Every detail is intentional: integrated appliances behind seamless fronts, illuminated display shelving, concealed storage with soft close internals. The brass accents carry through from handles to lighting, tying the kitchen to the dining area where a natural oak table grounds the space. Precision built, fully installed from design file to finished room.

DARK INDUSTRIAL KITCHEN

Less visible, more present.





A dark, monolithic kitchen where every surface is engineered to disappear. Matte black handleless cabinetry, fluted wall panels, and a mirrored backsplash create depth in a compact footprint. Linear LED lighting traces the architecture under cabinets, along ceiling recesses, turning functional illumination into a design element. The result is a kitchen that feels like a single sculpted volume, not an assembly of parts. Minimal, precise, unapologetic.

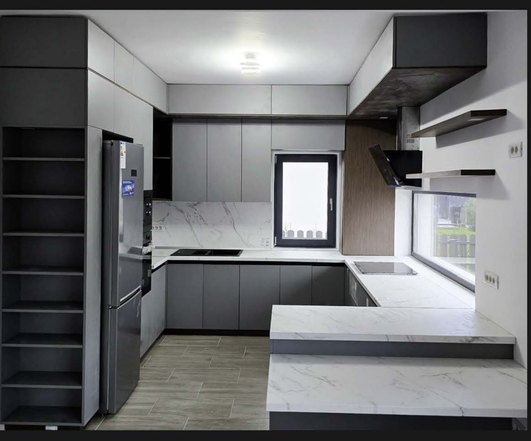
OAK & GRAPHITE KITCHEN

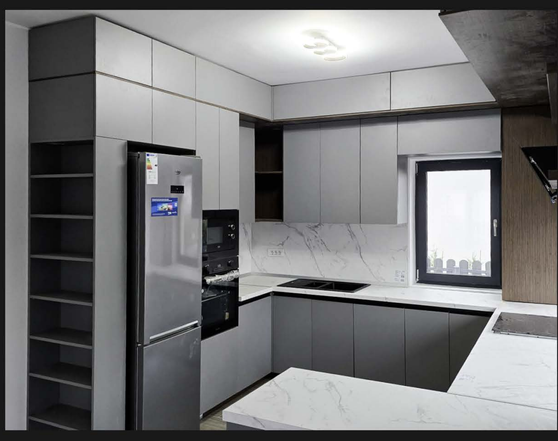
Everyday precision, nothing spare.

A clean contemporary kitchen built on the contrast between light oak and matte dark grey. Handleless fronts with integrated grip channels keep the lines sharp, while LED strips under the upper cabinets add warmth to the black backsplash. Built in appliances sit flush, the material transition is seamless, wood meets dark surface without a wasted detail. Functional, honest, and designed for daily use without compromise.

MORE KITCHENS PROJECTS

A contemporary kitchen built on the contrast between light oak and matte grey fronts a warm, balanced composition with subtle architectural accents. Integrated under cabinet lighting highlights the wood texture and brings a refined atmosphere to the work zone. Rigorous functionality, premium finishes and a quiet, sophisticated aesthetic designed for modern living.

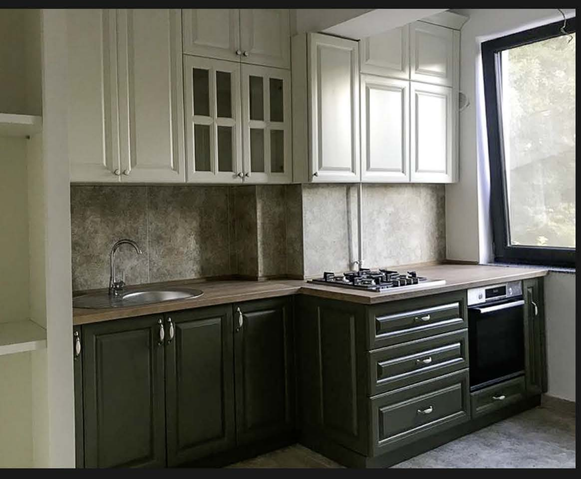


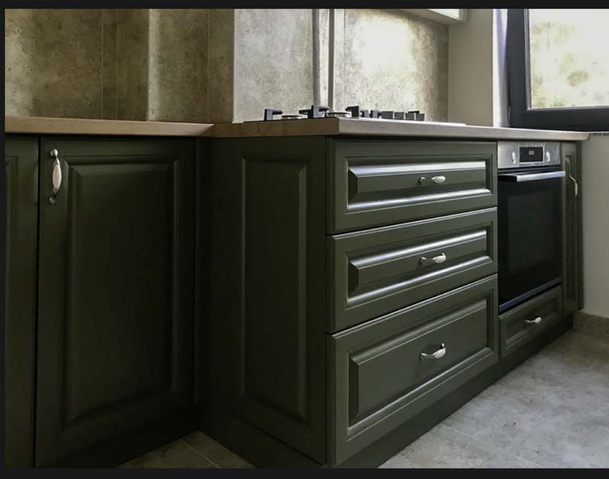


A monochrome kitchen where graphite cabinetry meets veined marble, a study in restraint, precision and cool sophistication. The U shaped layout maximises every corner, while open vertical shelving breaks the geometry with rhythm and breathing space. A confident, architectural composition built for those who appreciate clean lines and timeless materials.

A refined kitchen composed around dramatic Calacatta veining, soft taupe cabinetry and warm brass accents, quiet luxury with theatrical undertones. Backlit glass display units transform everyday objects into curated still lifes, while the sculptural island anchors the space as both workstation and gathering point. Tailored proportions, layered lighting and an unmistakable sense of occasion in every detail.

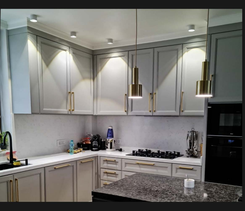
A modern classic kitchen where shaker cabinetry, exposed brick and aged brass converge into a warm, narrative driven space. The sage green hood becomes a sculptural focal point, balanced by the rustic backsplash and the soft sheen of speckled stone countertops. Heritage craftsmanship reinterpreted with contemporary precision, a kitchen with character, texture and a quiet sense of place.

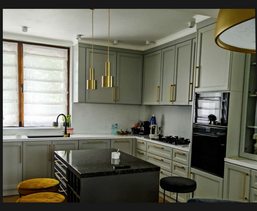




A timeless two tone kitchen pairing deep olive green base units with soft ivory uppers a sophisticated dialogue between earth and light. Classic raised panel doors and antique silver pulls bring traditional craftsmanship into focus, while the warm wood countertop adds a tactile, lived in quality. A composition rooted in heritage, designed for those who value patina, proportion and quiet character.

A bold, all black kitchen where shaker style cabinetry meets vintage brass hardware and a sculptural hood, classic silhouettes dressed in contemporary drama. Glass front uppers add depth and transparency, softening the intensity while inviting curated display. Confident, timeless and unapologetically elegant, a kitchen built for evenings, conversations and the richness of dark materiality.

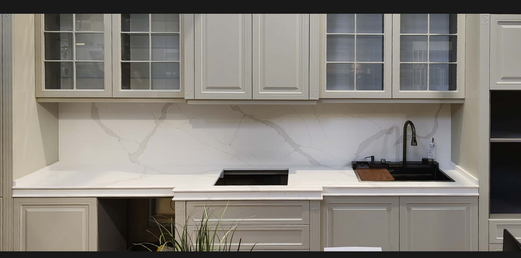




A sophisticated modern classic kitchen dressed in soft sage cabinetry, polished brass accents and a granite island that anchors the composition with quiet gravitas. Sculptural gold pendants cast a warm, gallery like glow, while mustard velvet stools inject a note of playful luxury. A layered, confident interior that balances traditional silhouettes with contemporary glamour and refined materiality.

A minimalist contemporary kitchen where handleless cream cabinetry meets the organic warmth of natural wood, a study in calm, architectural restraint. Seamless vertical lines run from floor to ceiling, while the integrated wood canopy and live, edge dining surface introduce a tactile, grounding counterpoint. Tan leather seating completes the composition, understated elegance built around light, texture and quiet proportion.

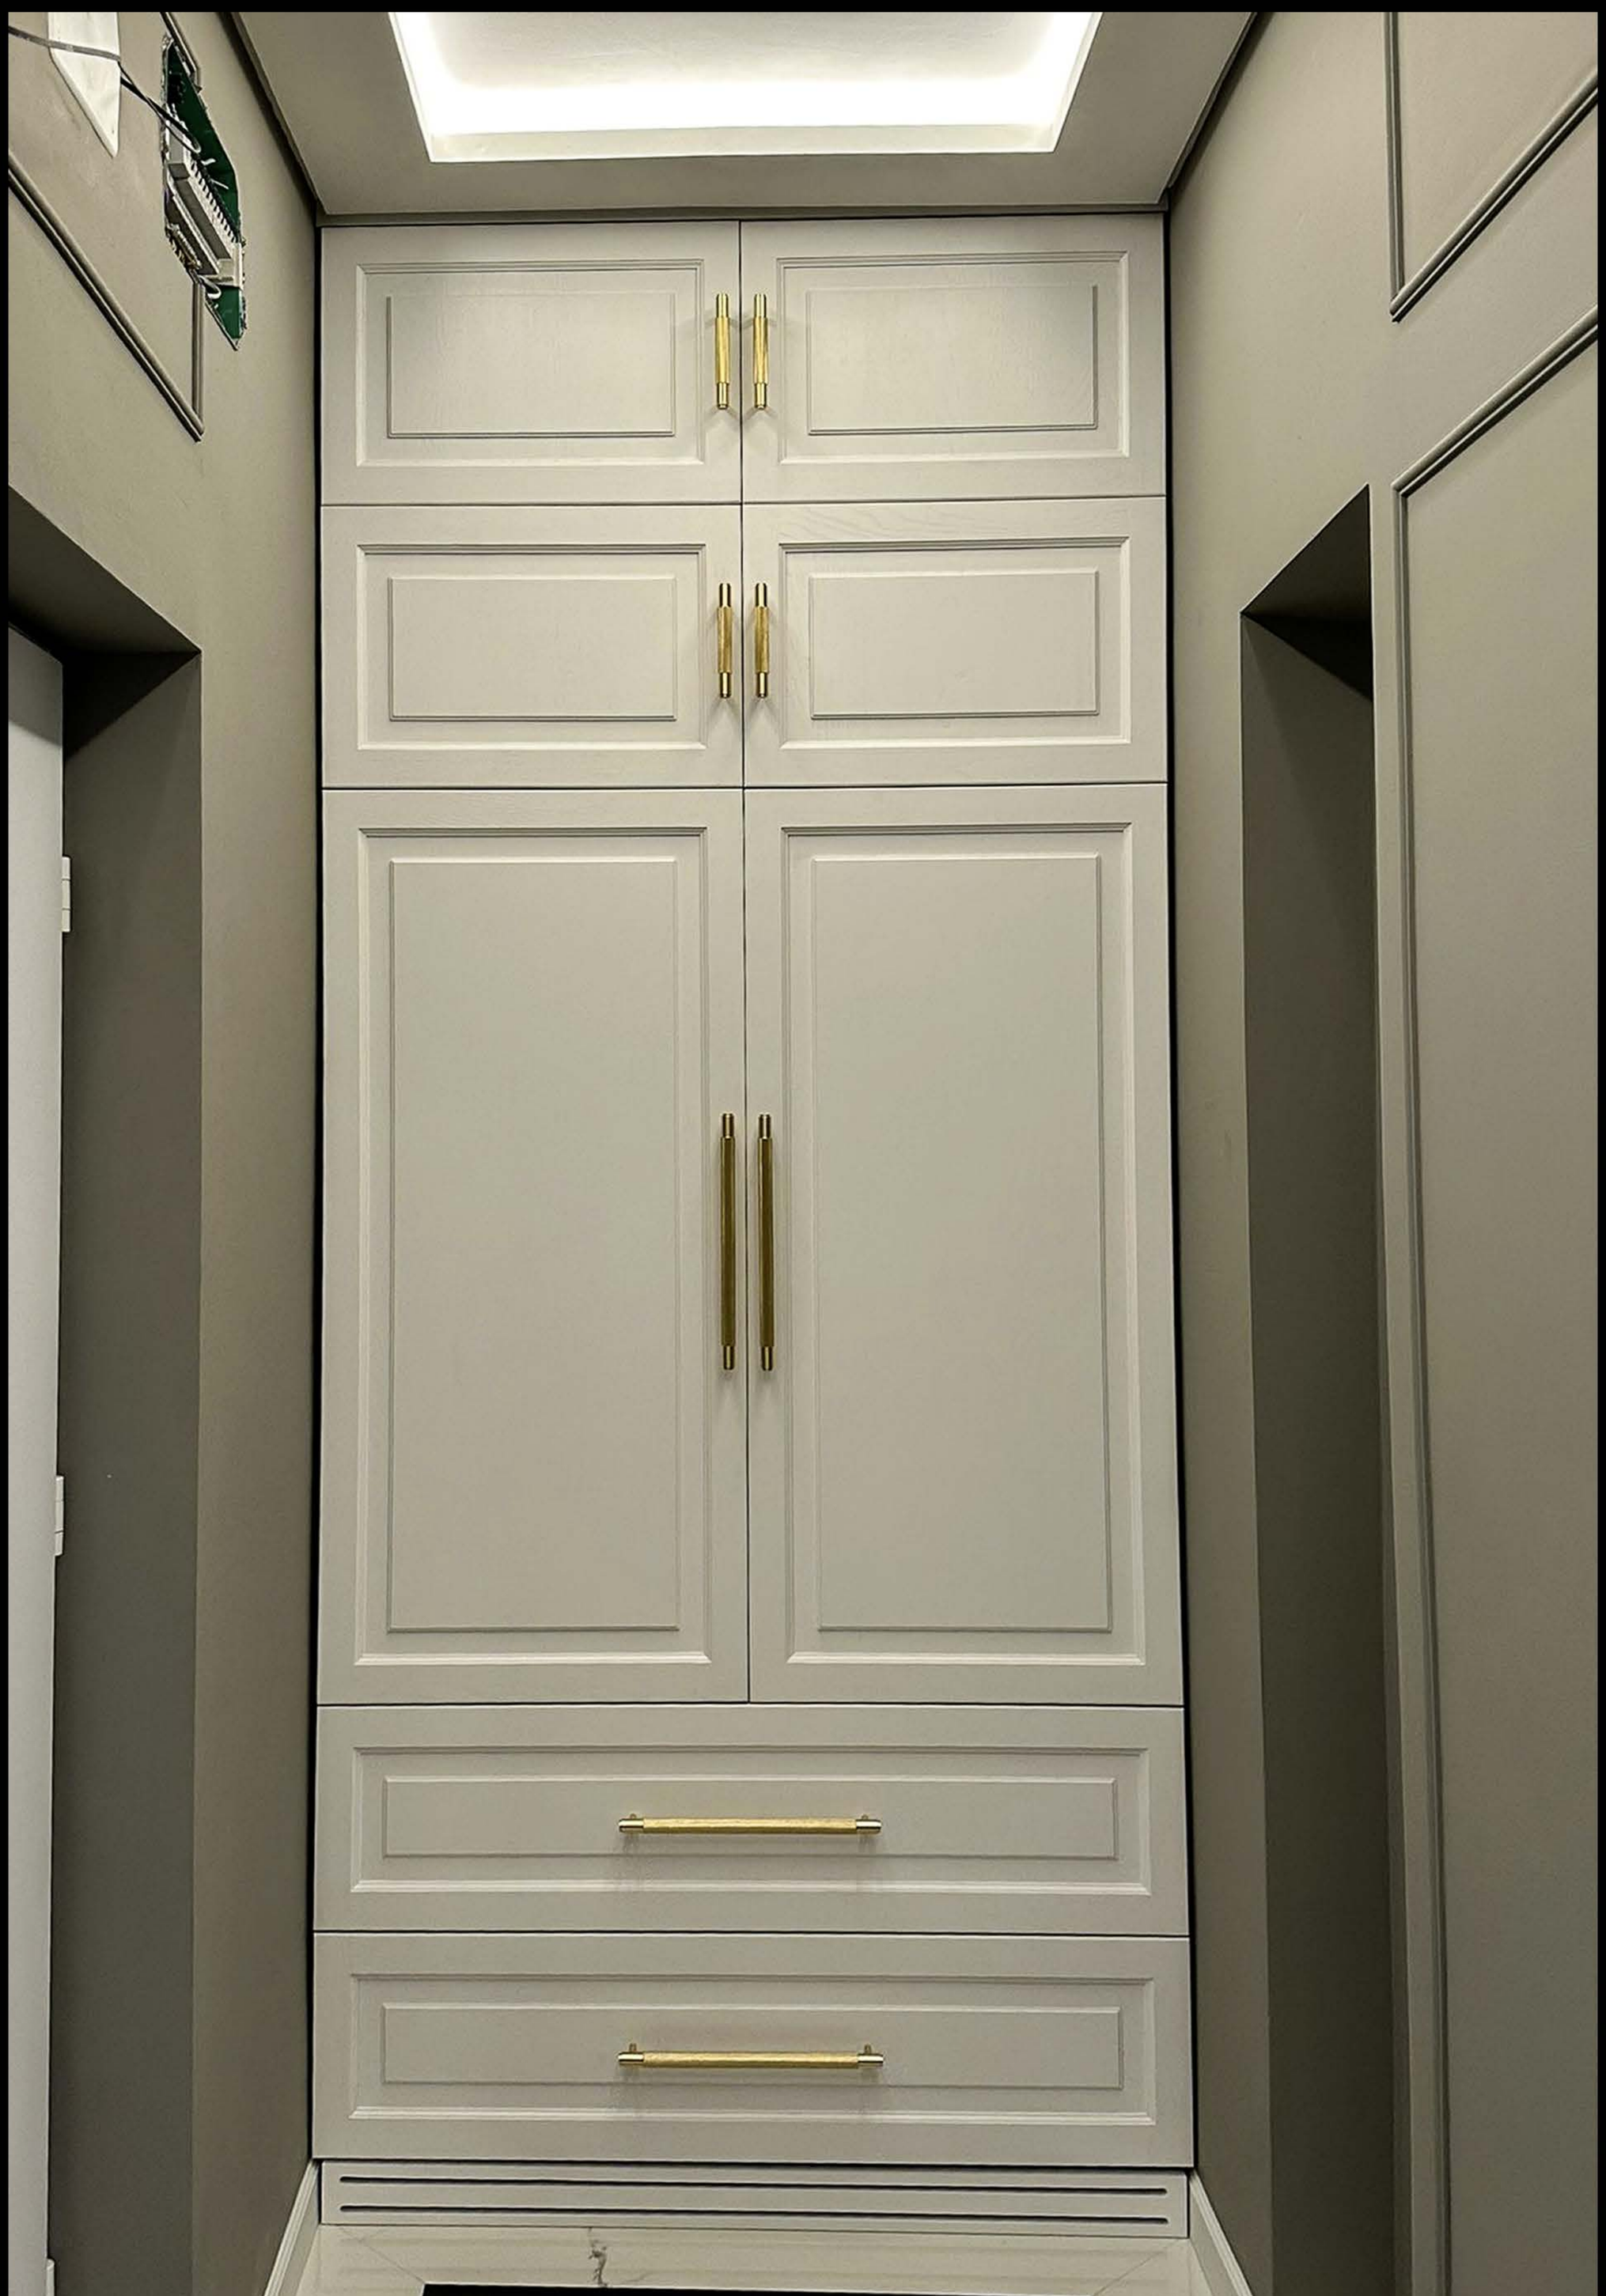
A compact Scandinavian inspired kitchen where crisp white cabinetry meets rich walnut panelling, a masterclass in spatial efficiency and warm minimalism. Integrated LED lighting carves out niches for display, while the cantilevered peninsula transforms into both prep surface and informal dining spot. Clean geometry, honest materials and a quiet sense of craft proving that refined design thrives in any footprint.



An elegant neoclassical kitchen defined by sculpted raised panel cabinetry, dramatic Calacatta marble and the quiet contrast of matte black fixtures. The veining flows seamlessly from countertop to backsplash, creating a continuous canvas of natural artistry that elevates the entire composition. Traditional proportions reimagined with contemporary sensibility, timeless materiality meets refined, architectural detail.

DESIGNED & PRODUCED

Bespoke furniture, precision built for every detail of your space.



CLASSIC DRESSING

Crafted details, flawless finish.

A bespoke entryway wardrobe designed with architectural precision, raised panel fronts, slender brass handles and proportions tailored to the space. The natural oak interior reveals the craft beneath the elegance: a structured composition of hanging space, shelving and a ventilated shoe base. Classical detailing meets considered functionality, a quiet statement of how custom furniture should be made.

CLASSIC DRESSING

Crafted details, flawless finish.

A bespoke walk in wardrobe engineered around discreet luxury, soft champagne drawer fronts, integrated LED lighting and a layout calibrated for effortless daily use. Raised panel detailing brings classical rhythm to the composition, while mirrored surfaces amplify light and spatial depth. Refined craftsmanship, thoughtful storage architecture and a sense of quiet ceremony, dressing as a daily ritual.

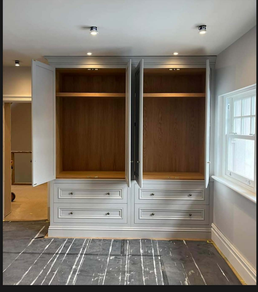
GREY DRESSING

Crafted details, flawless finish.

A contemporary built in wardrobe defined by pure geometry, matte graphite fronts, slim vertical pulls and a floor to ceiling presence that reads as architecture rather than furniture. Behind the minimal façade, a meticulously planned interior of hanging zones, drawer modules and vertical shelving delivers quiet, everyday precision. Restrained on the outside, rigorous on the inside, custom storage reduced to its most essential form.

HERITAGE JOINERY

Crafted details, flawless finish.



A built in wardrobe composed with English cabinet, making sensibility, raised panel doors, soft dove grey lacquer and aged bronze knobs set against a warm oak interior. Integrated into the architecture of the room, the piece reads as a natural extension of the walls rather than an addition. Classical proportions, tactile materials and the quiet authority of furniture built to outlast trends.

ATELIER COUTURE

Everyday precision, nothing spare.

A dressing room conceived as a private boutique, ivory cabinetry, glass front displays and integrated lighting that treats every garment as a curated object. Crown mouldings, mirrored accents and precision engineered compartments for jewellery, footwear and accessories define a space where storage becomes ceremony. Tailored craftsmanship at its most refined, wardrobe design elevated into personal atelier.

INTEGRATED LIVING

Everyday precision, nothing spare.

A custom wardrobe system designed as a complete bedroom solution, graphite fronts, warm oak shelving and a continuous workspace flowing into vertical storage. Open niches, hidden drawers and an integrated desk transform a single wall into a multi functional architecture of daily life. Thoughtful zoning, honest materials and the discipline of purpose, built cabinetry, where storage, study and rest coexist in quiet balance

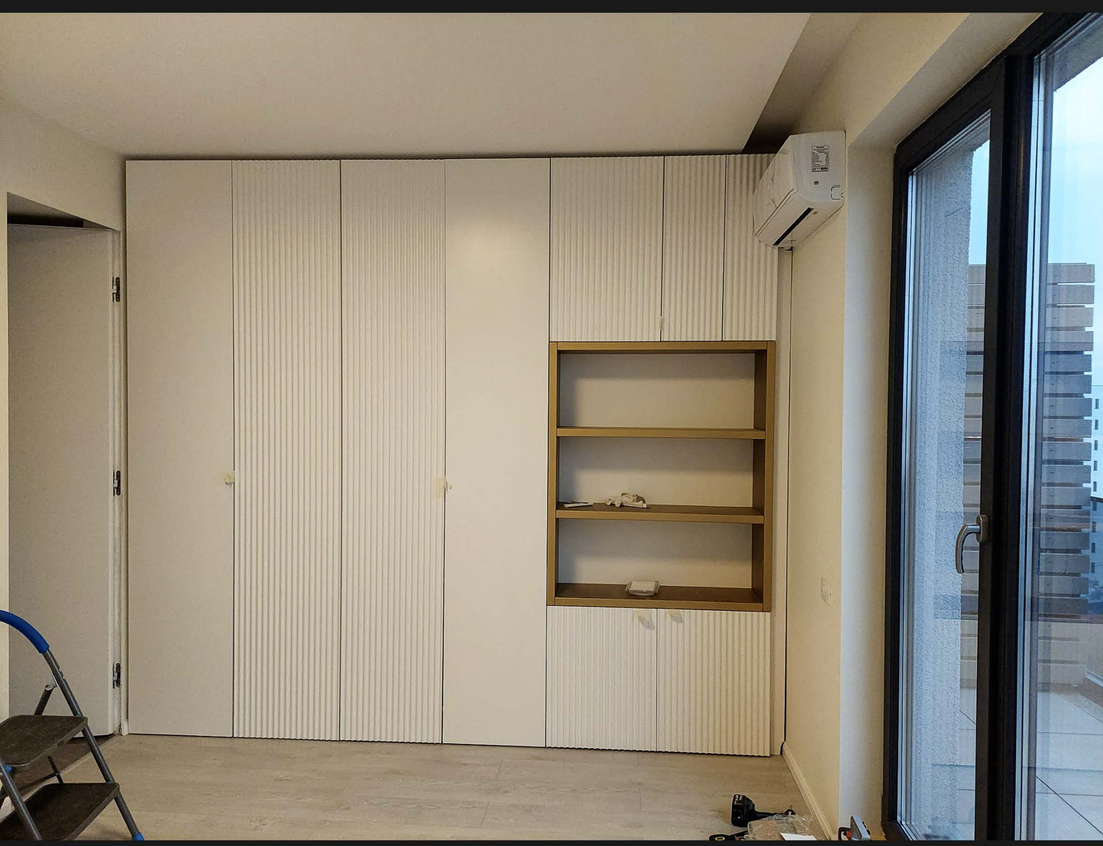
ATTIC ATELIER

Everyday precision, nothing spare.

A bespoke walk in dressing room engineered to embrace the architecture of a sloped attic, every angle resolved, every corner reclaimed as functional space. Crisp ivory cabinetry, classical raised panel drawers and generous open shelving create a luminous, gallery like environment around the body of the room. Precision joinery meets architectural challenge, proof that the most difficult spaces often yield the most rewarding wardrobes.

HIDDEN ARCHITECTURE

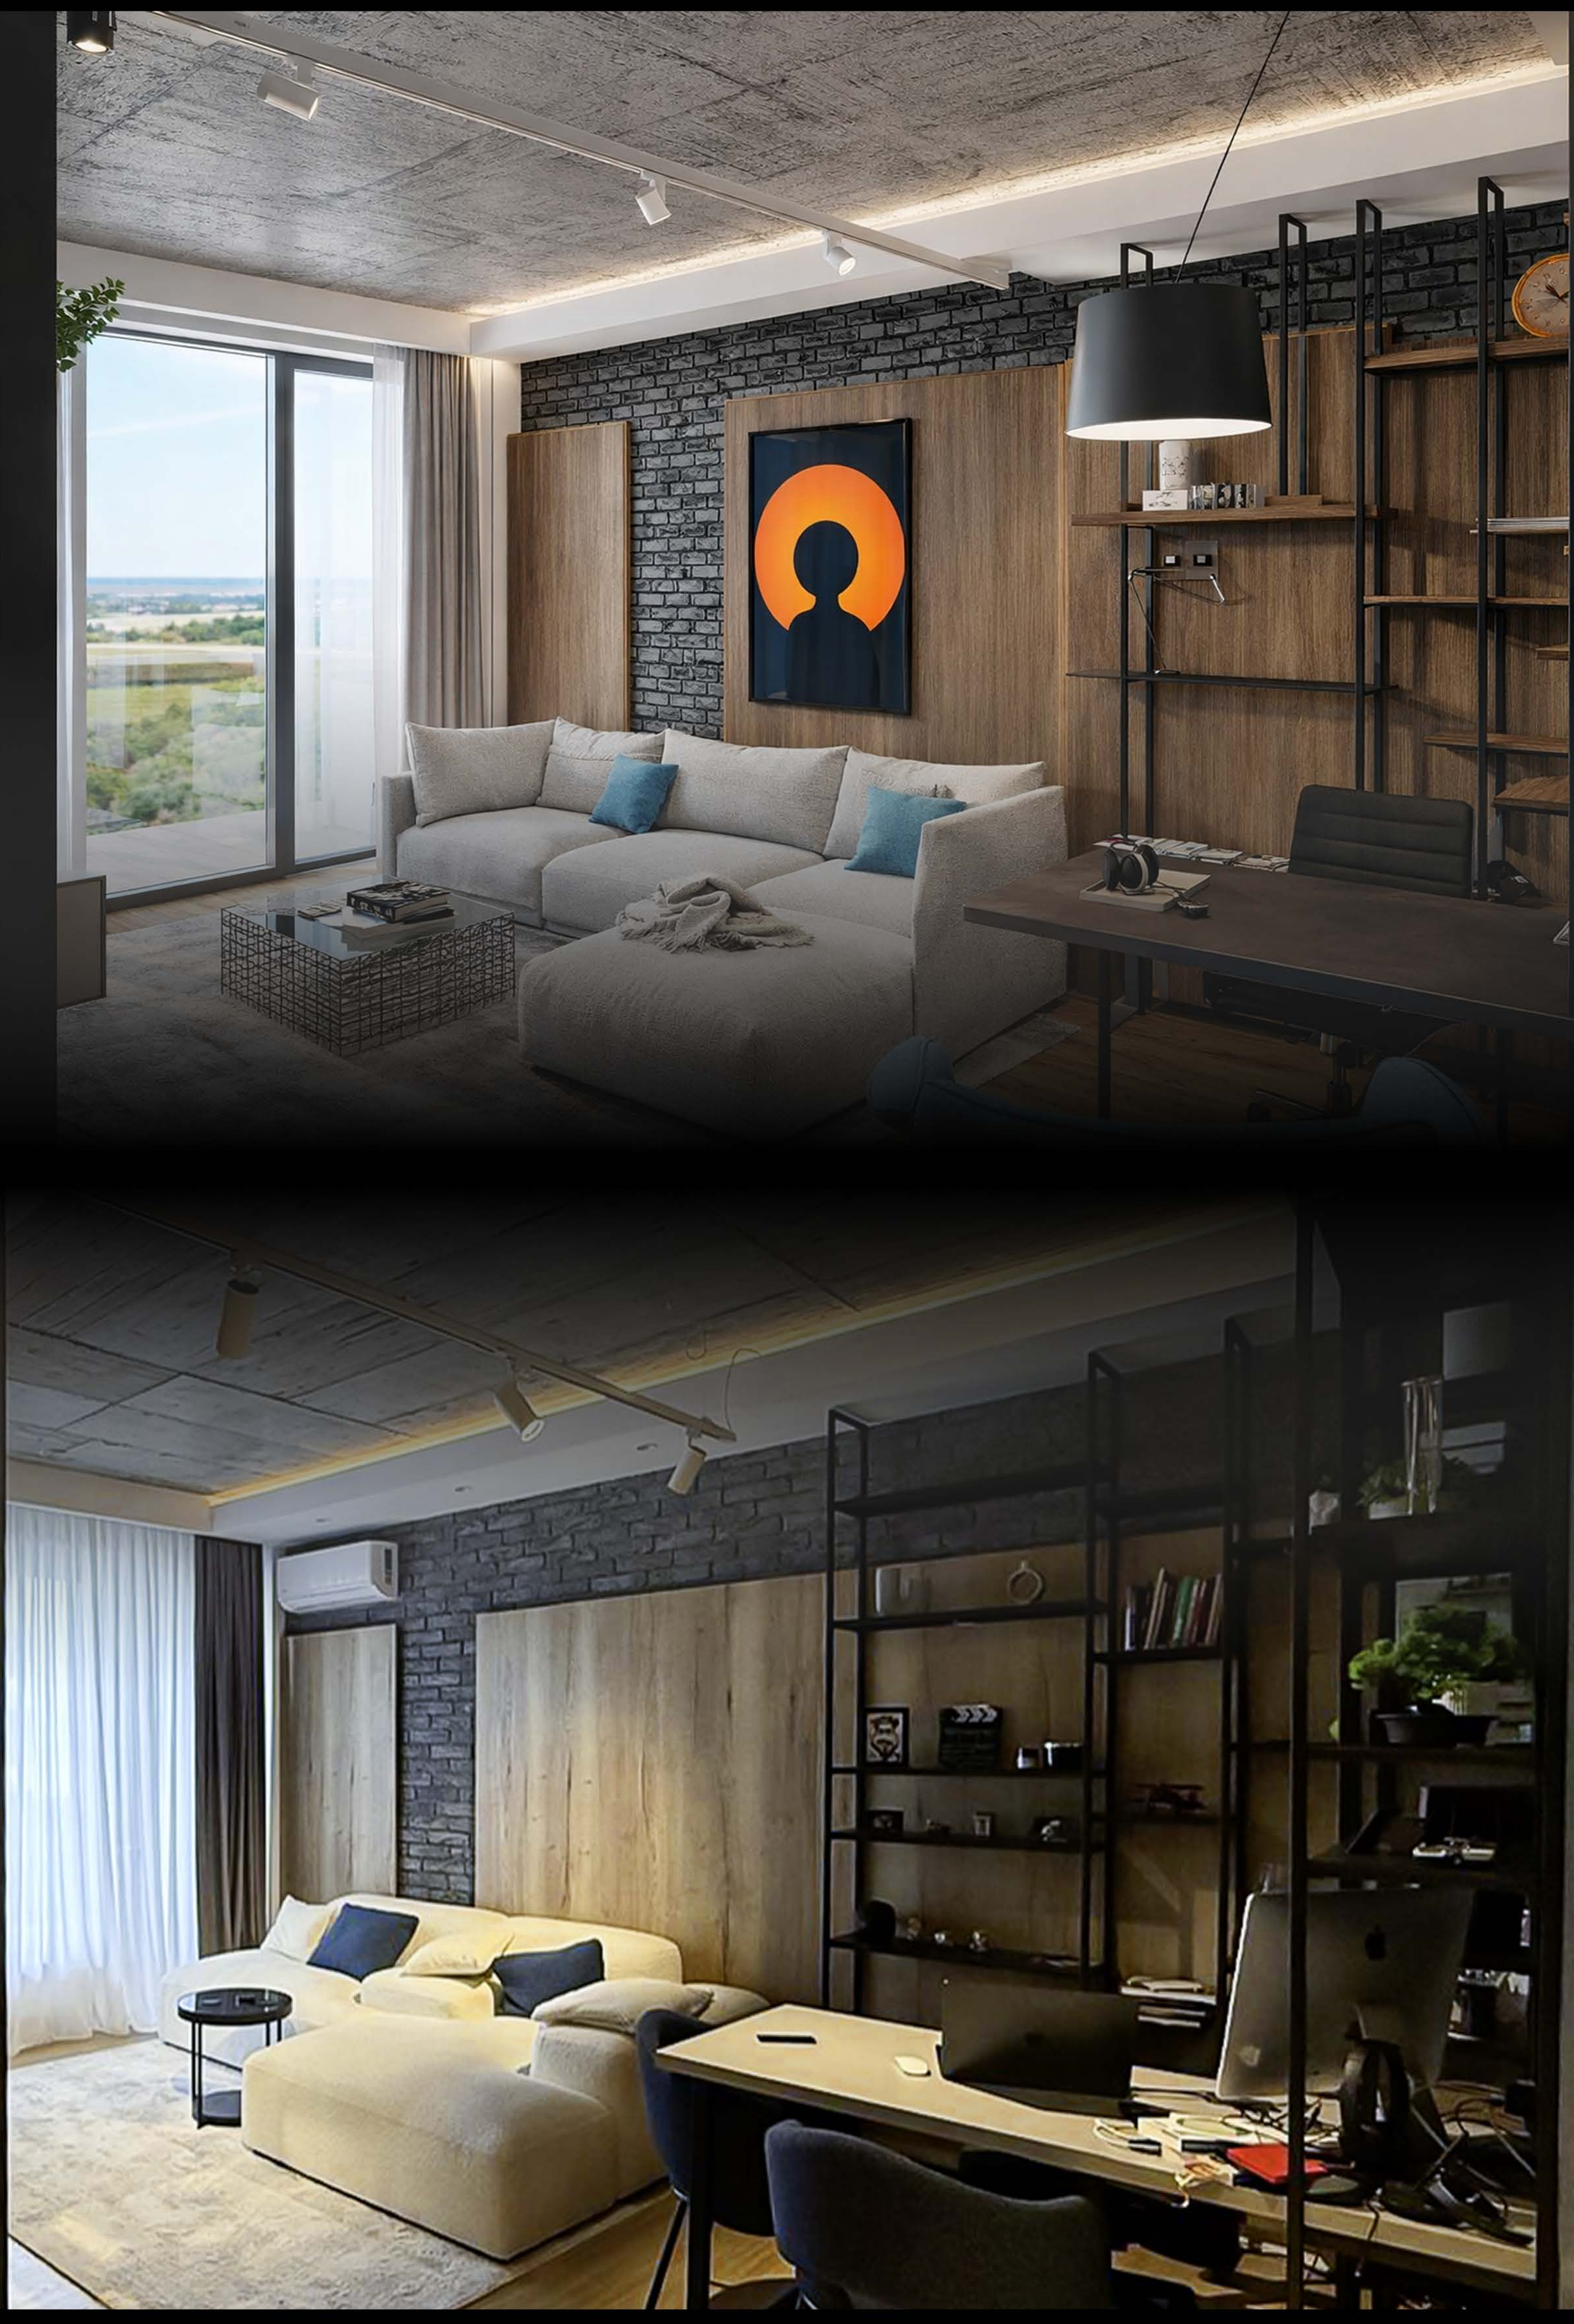
Everyday precision, nothing spare.



A custom wardrobe conceived as architectural sleight of hand, fluted white fronts dissolve into the wall, revealing generous storage only when touched. Vertical reeding brings subtle rhythm and tactile elegance to an otherwise seamless surface, while an integrated display niche adds a curated, gallery like pause. Storage reimagined as architecture where furniture disappears and the room becomes the design.

VISION TO REALITY

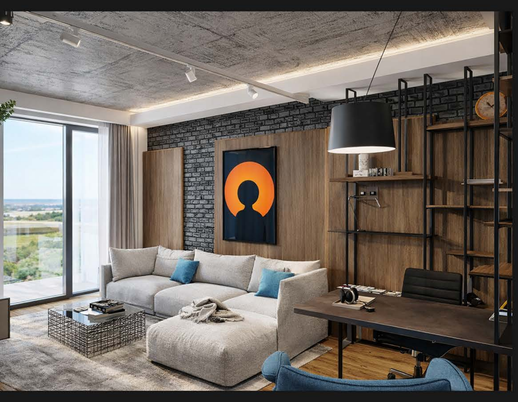
Designed, produced and delivered, in house.

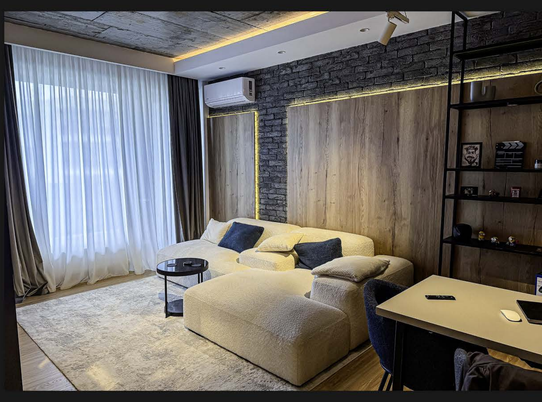


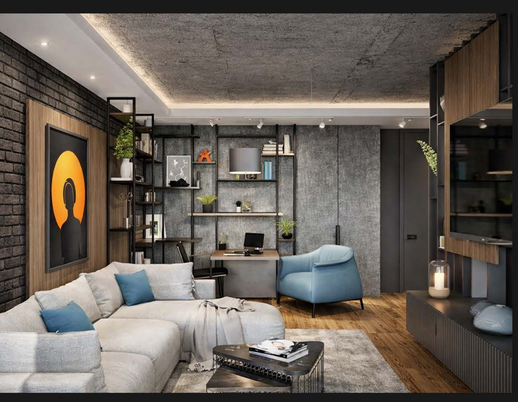
From the first render to the final detail, this is what structured execution looks like. Vision and reality, measured against each other.

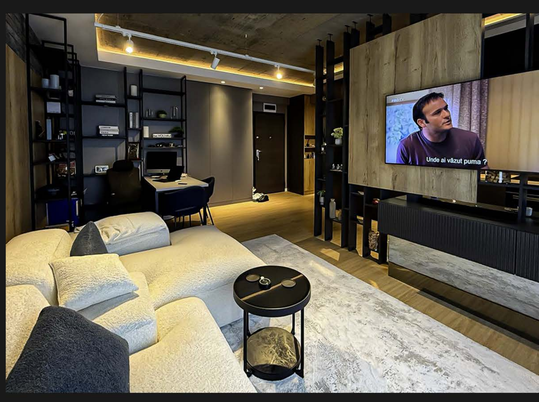
URBAN LOFT NARRATIVE

Industrial soul, tailored atmosphere.





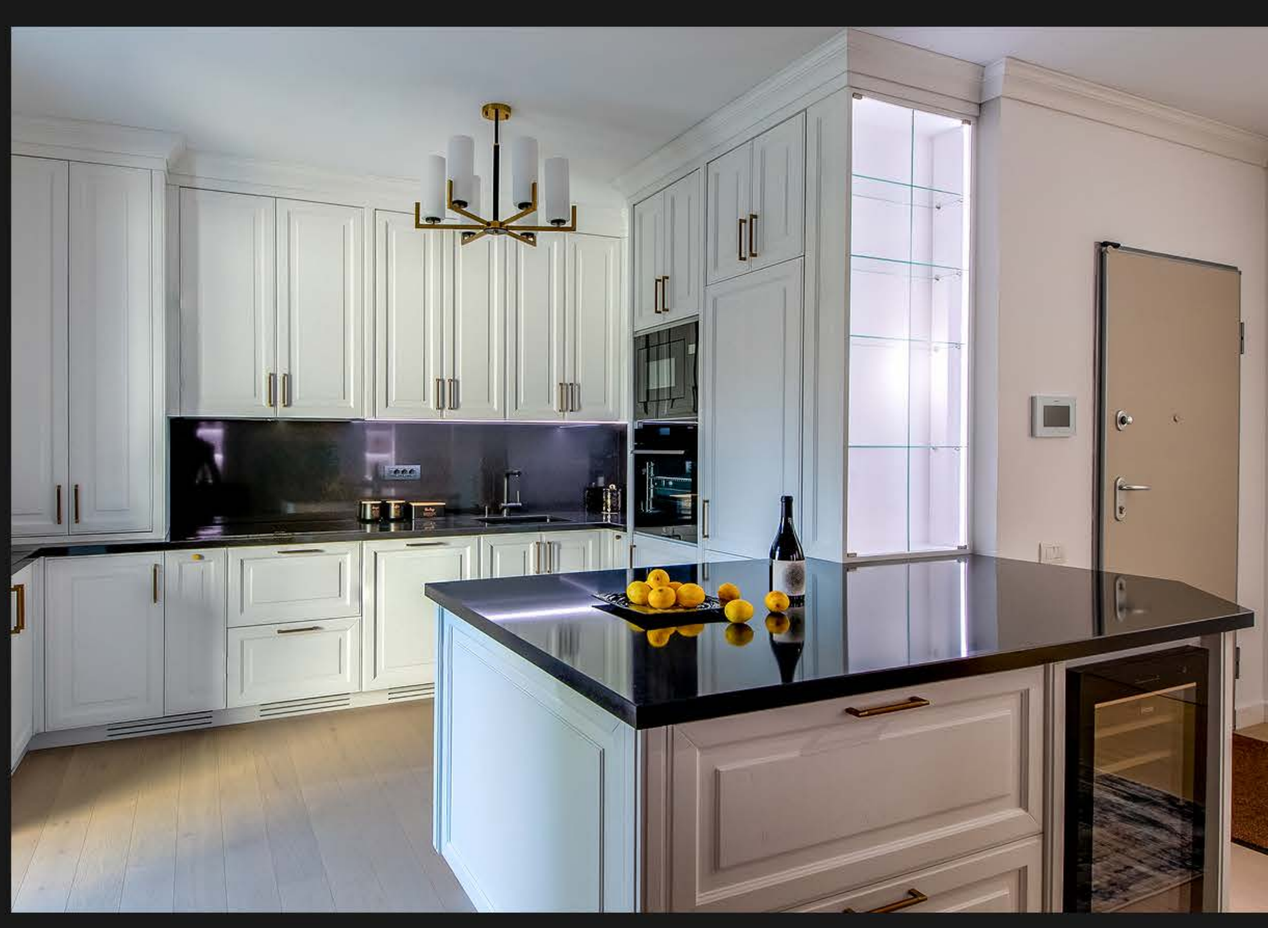




A contemporary industrial apartment where raw concrete ceilings, exposed brick and warm walnut panelling compose a bold, masculine interior with cinematic depth. Steel framed shelving, bespoke storage walls and layered lighting define distinct living zones, while accents of teal and mustard inject personality without disrupting the overall restraint. A carefully orchestrated narrative of textures, materials and atmosphere, urban living translated into a complete design language.

MODERN CLASSIC RESIDENCE

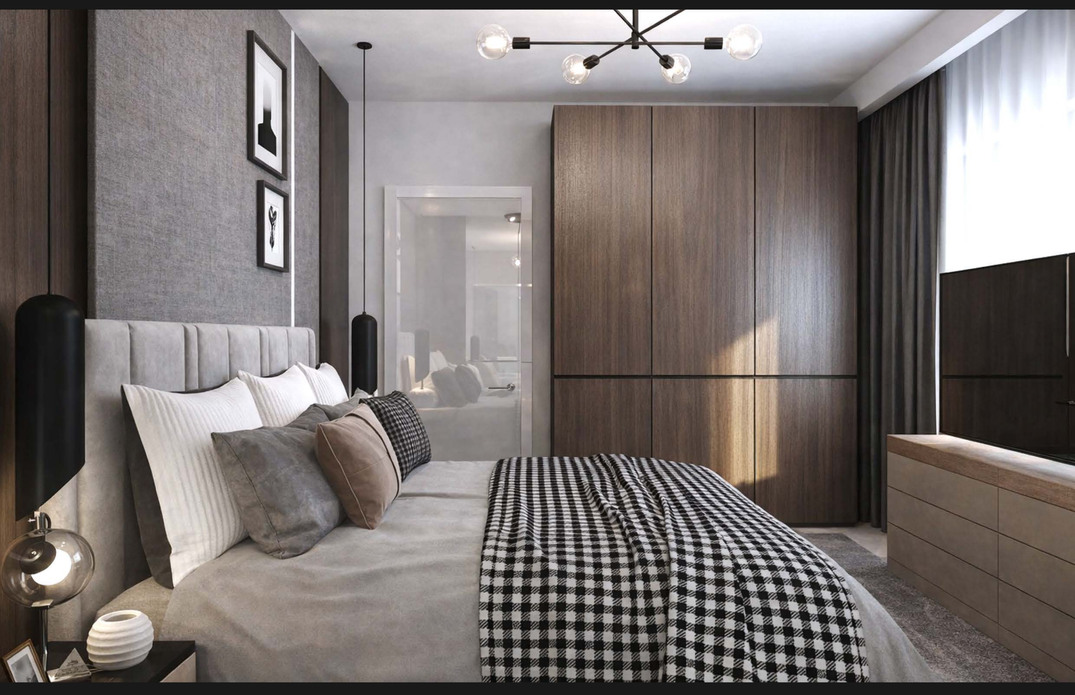
Timeless vocabulary, contemporary spirit.

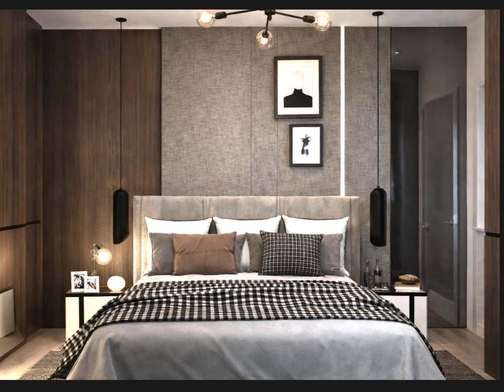


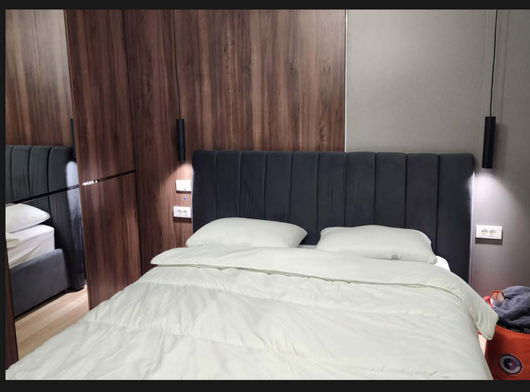
A refined apartment where crisp white paneled cabinetry, brass detailing and rich black marble surfaces compose a timeless, light filled interior. Architectural mouldings, illuminated display niches and sculptural chandeliers bring gallery like gravitas to both kitchen and living areas. A careful balance of tradition and restraint, classical vocabulary reinterpreted for contemporary urban living with elegance, warmth and quiet prestige.

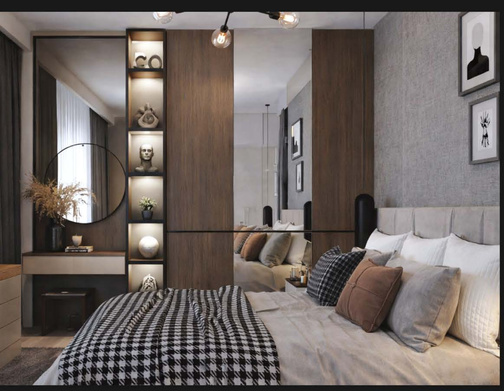
COMPACT MODERN STUDIO

Where every centimetre has a purpose.





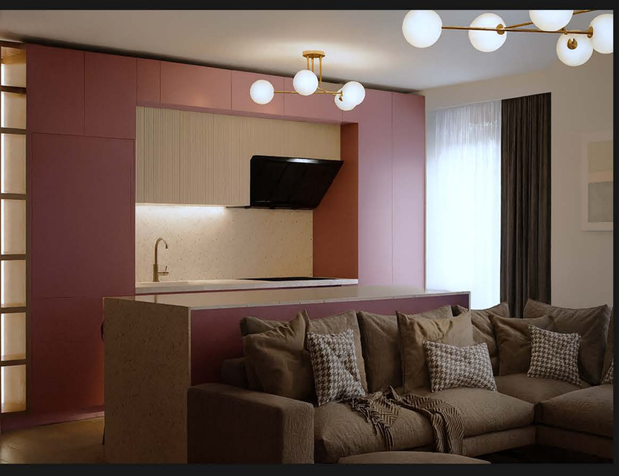


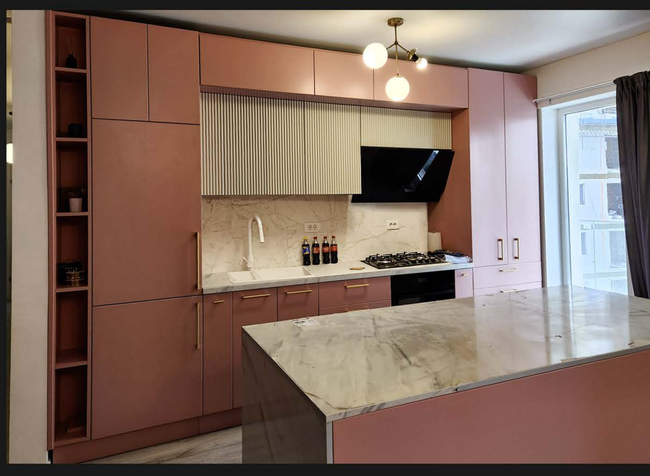


A masterclass in small footprint living where warm walnut joinery, upholstered headboards and layered neutrals compose a refined, hotel inspired atmosphere. Every surface earns its place, integrated wardrobes, bespoke kitchen cabinetry and carefully placed lighting turn a modest footprint into a fully resolved sanctuary. Rich materiality, considered proportions and the intimacy of a space designed for how modern urban life actually unfolds.

ROSÉ FEMININE

Where colour becomes character.





A distinctive residential interior built around a rich dusty rose palette, fluted wall panelling and sculptural brass lighting, bold yet inviting. The media wall anchors the living area with soft uplighting and a floating console, while the coordinated pink kitchen extends the narrative with matte cabinetry and veined marble surfaces. A confident feminine sensibility expressed through colour, texture and lighting where warmth meets personality and every room speaks in the same voice.

WORKSHOP TO REALITY

Where craftsmanship becomes visible.

A bespoke bedroom storage system shown from workshop to final installation, bridging the full journey from raw cabinetry to refined interior. Twin wardrobes frame the upholstered bed, while the integrated overhead bridge with open shelving maximises every vertical centimetre. Ivory lacquered fronts, classical detailing and precision joinery transform a standard bedroom into a fully tailored, built in composition, craftsmanship visible in both the making and the result.

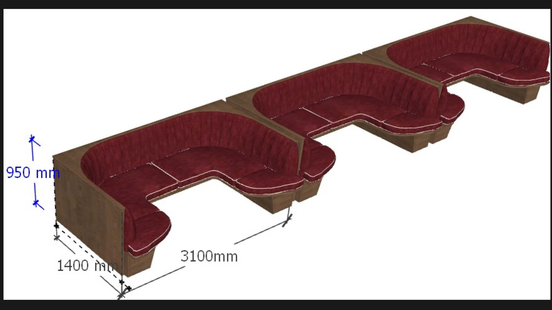
A traditional solid wood kitchen documented from raw assembly to fully finished installation, a rare glimpse into the discipline behind classical cabinetry. Hand carved details, fluted columns and ornamental cornices reveal their character as the piece transitions from pale timber into a rich mahogany finish. Old world craftsmanship executed with technical precision, a reminder that true heritage furniture is built, not assembled.

A bespoke kitchen presented from 3D concept to final installation, proving the precision of a design process where nothing is left to chance. Deep charcoal shaker cabinetry, glass front display units and a sculptural hood translate directly from render to reality, with brass hardware adding a touch of quiet warmth. Technical rigour meets classical silhouette, the discipline of designing every millimetre before a single panel is cut.

A custom bedroom wardrobe shown side by side, technical drawing and finished piece, illustrating how precise measurement becomes refined furniture. Dimensioned in millimetres and planned around the room's architecture, the final composition delivers graphite fronts, warm oak shelving and an integrated workstation exactly as engineered. Design accountability made visible, where the blueprint and the built reality are one and the same.

A monumental bespoke wardrobe documented from workshop assembly to final installation, raised panel doors, architectural cornice and the stately proportions of traditional cabinetmaking. The transformation from pale raw timber to deep sage lacquer reveals the layers of craftsmanship between conception and completion. Built to endure, a piece that reads less as furniture and more as architecture, anchoring the room with quiet authority.

A minimalist custom kitchen captured from raw carcass to polished installation, the quiet journey from workshop construction to refined daily use. Handleless cream cabinetry frames a warm oak niche, while a travertine effect backsplash and matte black fixtures bring tactile contrast to the composition. Disciplined geometry, honest materials and the reassurance of seeing exactly how a seamless interior is actually built.

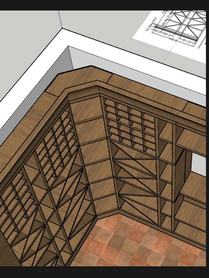


A bespoke commercial seating installation presented from 3D blueprint to completed hospitality interior, custom velvet banquettes engineered with precision for a sports lounge environment. Deep ruby upholstery, fluted walnut backs and brass footed marble tables compose an atmosphere of theatrical warmth against the emerald mosaic flooring. End to end project delivery measurement, fabrication and installation orchestrated into a cohesive commercial space built to welcome, impress and perform.

CRAMA VIIȘOARA

Where craftsmanship becomes ceremony

A sculptural tasting bar designed as the centrepiece of the Crama Viișoara cellar, a signature moment where craftsmanship becomes brand. The back wall is composed of stacked walnut barrel head medallions, arranged in a precise grid and lit from behind to create a warm, glowing rhythm across the surface. Two generous LED lined arches frame the composition, echoing the language of traditional vaulting while introducing a distinctly contemporary edge. Above, the custom brass emblem and engraved signature panel anchor the piece with a clear sense of identity and ceremony. A solid oak counter runs across the foreground, grounding the display with the quiet weight of natural timber. More than millwork, it's a purpose built stage where wine, ritual and hospitality converge into a single, unforgettable visual statement.



A bespoke wine cellar commission captured from empty shell to fully realised interior, a rare documentation of architectural scale cabinetry unfolding over time. Solid oak wine racks, arched timber vaulting and warm integrated lighting transform a raw space into a private cellar of theatrical depth. Custom joinery at its most ambitious, storage, architecture and atmosphere engineered into a destination space built to age as gracefully as its contents.

A bespoke wine cellar shown in its final form, solid oak racking wrapping the entire perimeter, punctuated by recessed backlighting that turns every bottle into a curated object. Arched timber vaulting overhead brings architectural rhythm and a sense of ceremony, while the central arched gateway frames the space like the entrance to a private vault. Warm tones, tactile materials and layered light compose a cellar that feels equal parts functional, atmospheric and quietly theatrical.

IOHAN
DESIGN STUDIO

WHY WORK WITH US

ONE STUDIO
Every Stage

We don't hand off work. From the first conversation to the moment you walk into a finished space, every stage is managed in house, concept, spatial design, 3D visualization, custom furniture production, material sourcing, contractor coordination and on site supervision. Over eight years of residential and commercial projects have shaped a process that is rigorous, transparent and built around one principle: what we design is what gets built. With over 180 completed projects and direct founder involvement at every step, we bring both the creative vision and the technical depth to execute without compromise.
